

COVID-19 and Fire Engine visits

Hello everyone, Kevin here...

The Fire Engine will be clean and disinfected prior to your event. I have had my Flu Shot, however I will not attend if I develop an elevated temperature or show signs of Flu like symptoms.

No one should attend your gathering if they are unwell or showing Flu like symptoms.

Passenger distancing restrictions no longer apply to Tour/Charter Vehicles (this is the licensing category for the Fire Engine). However, to be socially responsible I will be doing several rides with fewer passengers rather than usual.

One Household - There are no restrictions on 'Households' regarding social distancing among themselves, since they already live and do life together. W.A. Gov guidelines say that where children are shared between households, because of family dynamics, they are considered to be one 'Household' for the purpose of gathering together.

Mixed Households - The Host of the event should keep a record of the contact details of all guests attending, and a big emphasis on Hygiene and Distancing remains.
